# Global coin WHITEPAPER

Proposed By:  
**GC TEAM**

# Abstract

Global coin(GC) is a next-generation BEP-20 token built on the Binance Smart Chain (BSC). Designed to revolutionize the landscape of digital transactions and decentralized finance, Global coinintroduces a unique approach to tokenomics, aiming to foster community growth, incentivize holders, and ensure the sustainability of the ecosystem.

# Introduction

In the ever-evolving world of cryptocurrencies, Global coin Token emerges as a beacon of innovation and reliability. With a total supply of only 500,000,000 tokens, GC leverages the power of decentralized finance (DeFi) to provide users with seamless transactions, robust security, and rewarding incentives.

## **Tokenomics:**

Token Symbol: GC

Total Supply: 500 million

## **Token Utility:**

GC serves as a versatile utility within the ecosystem, facilitating various functions including but not limited to:

## **Transaction Medium:**

GC enables fast and secure peer-to-peer transactions within the Binance Smart Chain network.

## **Governance Rights:**

GC holders may participate in governance processes, influencing the direction and evolution of the GC ecosystem.

# Roadmap:

## Phase 1 (Q1-Q2 2024):

- Token Deployment
- Website Launch
- Launch on Pancakeswap
- List On CMC & CG

## Phase 2 (Q3-Q4 2024):

- Marketing and community Building
- Launch on other DEX

## Phase 3 (2025 and Beyond):

- Expansion of partnerships and adoption initiatives
- Launch on Centralized Exchanges

## **What is Binance Smart Chain**

Binance Smart Chain (BSC) is a block chain network built for running smart contract-based applications. BSC runs in parallel with Binance's native Binance Chain (BC), which allows users to get the best of both worlds: the high transaction capacity of BC and the smart contract functionality of BSC. Binance Chain provides a marketplace for exchanging crypto assets. The team also constructed a Binance decentralized exchange called Binance DEX. Binance Chain also allows users to develop decentralised applications on top of the chain. It is a decentralised and transparent blockchain and also offers low trading fees. Highest safety through the BSC network and the algorithm it operates on are indeed very safe. The track record of BSC clean of incidents or hacks shows that there are no known vulnerabilities or attack vectors that could be abused on the blockchain itself.
